EDUCATION

SECONDARY EDUCATION

Phoenix School
2021 - 2023

BACHELOR OF ENGINEERING

SVIT, Vasad

2023 - 2027

SKILLS

TECH SKILLS

- Programming: Python, Streamlit
- Data Analytics
- Frontend: HTML, CSS (tailwindcss), JavaScript (Three.js)

SOFT SKILLS

- Problem Solving
- Collaborative
- Logical thinking

LANGUAGES

- English
- Hindi
- Gujarati

PROFILE

I'm Pranav Gohil, motivated and passionate towards data analytics and Python programming. Proficient in NumPy, Matplotlib, and Pandas, with hands-on experience developing a prototype for average order analysis using Python and Streamlit. Eager to apply analytical skills to real-world problems and continuously expand knowledge in data science and software development.

PROJECTS

- **Average Order Analysis Prototype**
  - Developed a prototype for analyzing average order values and trends using Python and Streamlit.
  - Implemented data processing techniques using Pandas to clean and structure order data.
  - Used Matplotlib to visualize trends and generate insights for business decision-making.
  - Designed an interactive dashboard for user-friendly data exploration..

- **ServiSync**
  - Currently working with a team to develop a home services platform for seamless customer booking and service management.
  - Working on Three.js at present to build an appealing and user friendly UI for this project.

As a student with a passion for data analytics, Python programming, and UI design, I aspire to build a career that combines technical expertise with creativity. My goal is to master data analysis, visualization, and automation, to solve real-world problems.
I'm eager to take on opportunities to gain practical experience. In the long run, I aim to become a skilled data analyst or Python developer, working on impactful projects in business intelligence, automation, or AI-driven analytics.
